→ **25024**
The **NVB Viking RX 3.5x40** is the most powerful NVB in the Viking series. It comes with removable, individual, collimated, doubler lens, and can be transformed to a 2x24 unit by removing the 40 mm lenses.
29093 The **NVB Viking 2x24 Doubler** can be used with all binoculars of Viking series and allows to increase the magnification of these binoculars from 2x to 3.5x.

Viking night vision binoculars are compact, lightweight and provide a wide field of view. The water resistant body increases the binocular's versatility, while the central focusing knob and fixed eye span distance provide comfort and reliability. The night vision tubes housed in the rugged, rubber armored body provide high-quality viewing in night-time conditions. Viking binoculars utilize built-in PULSE™ infrared illuminators for added image clarity in total darkness. The soft eyecup prevents external light distortion and leakage from the device, allowing the user to remain hidden in the night. The exclusive ECLIPSE™ lens cap system is an additional feature that allows the lens cap to be moved out of the way with a twist of the wrist. The Viking's 2x24 magnification is perfect for general observation, outdoor activities, hunting, commercial and sport fishing, search and rescue.
